

Fiber blowing machine MAH-4 Universal Elektronik

Fiber blowing machine is equipped with:	Specification of fiber blowing machine	
<ul style="list-style-type: none"> - Equipment for blowing one fiber diameter (profile rollers, head input) - Fixings for three diameters of HDPE pipes - User manual - CE declaration - Tool box - Set of tools for operating the machine - A pneumatic pistol for maintaining cleanliness - Multifunctional intelligent touch controller (two modes of manual operation and automatic, parameter registration blowing, GPS, reading the conditions weather, wireless connection and updates, report from blowing) - Suitcase with battery and cable power - Transport box - Compressor with a cooler and a water separator is required 	Zasilanie sterownika	12V (18AH akumulator)
	Working pressure	6-15 atmospheres
	Engine operating pressure	0.63 MPa
	Head operating pressure	6-15 atmospheres
	Speed of input fibre	0-100 m / min
	Engine air consumption	48 m ³ / h
	Head air consumption	1-11 m ³ / min
	Weight of machine	50 kg
	Dimension	660mm x 530mm x 480mm
	Bearing numbers	20 pieces
	Rolls number	4 pieces
	HDPE pipe diameter	4mm-50mm
	Fiber cable diameter	1 mm - 17 mm
