

Fibre blowing machine MINI MAH-4

Fiber blowing machine is equipped with:

- Equipment for blowing one fiber diameter (profile rollers, head input)
- Fixings for three diameters of HDPE pipes
- User manual
- CE declaration
- Tool box
- Set of tools for operating the machine
- A pneumatic pistol for maintaining cleanliness
- Multifunctional intelligent touch controller (two modes of manual operation and automatic, parameter registration blowing, GPS, reading the conditions weather, wireless connection and updates, report from blowing)
- Suitcase with battery and cable power
- Transport box
- Compressor with a cooler and a water separator is required

Specification of fiber blowing machine

Controller power supply	24V (18AH battery)
Working pressure	6-15 atmospheres
Speed of input fibre	0-100 m / min
Head air consumption	0.5-1 m ³ / min
Weight of machine	10 kg
Dimension	260mm x 220mm x 260mm
Bearing numbers	21 pieces
Rolls number	2 pieces
HDPE pipe diameter	∅ 1.6mm-14mm
Fiber cable diameter	∅ 0.5mm-4mm
